

Follow Up Appointment

- Please make sure you have a follow up appointment scheduled with our office for 7-10 days after surgery.

Activity

- You may walk around as tolerated. There is no reason to stay at bed rest.
- Walking up and down stairs is ok.
- Contact sports, bike riding, skateboarding, trampolines and other activities where falling may occur are restricted for about 2-4 weeks, but discuss this with the doctor.

Wound Care

- Dressings can be taken off after two day.
- Steri-strips over the incision will fall off in 2-3 weeks.
- It is ok to shower after the dressings are off. Just do not submerge the incision under water (bathing or swimming) for 4 weeks.

Restrictions

- No heavy lifting per surgeons instructions
No lifting over _____lbs for _____weeks.
- No swimming or hot-tubs for 3 weeks.
- No driving while taking pain medications.
- It is ok to drive when you would feel comfortable to slam your foot on the brakes.

School Release

- We will discuss your school release at your follow up appointment. Generally, you can go back to school about 1 week after surgery. This will be with no PE/sports for 2-4 weeks.

Diet

- There are no specific restrictions. It is a good idea to drink plenty of fluids.
- It is best to start with bland foods before spicy foods.

Medications

- You will be given a prescription for pain medicine. Use as directed.
- If you are given a prescription for antibiotics, it should be taken as directed until finished.
- It is helpful to use Ibuprofen (Motrin or Advil) with your pain medicine. You should take this as directed with food to avoid stomach irritation. Do not take Tylenol with the pain medicine.

- Pain medication refills can NOT be called into a pharmacy, you must come to the office the provider is working at that day to pick it up in person. You will need to provide ID and sign a slip. This means you can not have refills at night or on weekends.
- Pain medicine can cause constipation. Drink plenty of fluids. Use stool softeners as needed. You can use a light laxative like Milk of Magnesia if needed.
- If you are following the above instruction and do not have a bowel movement after two days please contact our office.
- Continue all medications that you had been on prior to surgery.
- If your pain medication is not working and you would like to request a different medication, you will need to either bring in the written prescription or the remaining pills if you have already filled the prescription. We will NOT give you another prescription without one of these.

Office Information
